
Curriculum Development "Open Data"

ProXML is partner in the Erasmus+ sponsored ODEdu project: Innovative Open Data Education and Training based on PBL and Learning Analytics.

We are seeking for a six month contract a person who is responsible within this project for delivering:

- a report on "Stakeholders Needs regarding Open Data"

This report will list the Open Data related knowledge, skills and attitudes that a) university students, b) private sector employees and c) public sector civil servants need to obtain to publish and consume open data. This report will result in a curriculum structure that will comprise units of learning for each Open Data Lifecycle phase.

- a report with a "Living Labs" analysis.

This report provides a comprehensive analysis of the Living Labs research concept and present ways this concept can be exploited for Open Data training.

Requirements:

- master in Education and Training
- very fluent in English (spoken en written)
- good report/paper writing skills
- willing to travel occasionaly (project members in Greece, UK, Denmark, Malta)
- ICT skills are a plus

WorkPlace:

- Offices in Leuven and Keerbergen and work from home is possible.

We offer:

- a market conform remuneration
- payed travel expenses
- flexible working hours
- an international and academic work environment
- on the job training in "open data"
